

5 reasons to use ActivPush

Receive all your faxes and voice messages in your email with ActivPush.

- Fax: receiving unlimited.
- Voice messages and Tmails: receiving unlimited.

You are a professional and do not want to spend money on a fax machine that will prove out-of-date shortly?

You are starting a business and need to receive faxes anywhere, anytime?

You need a second fax machine but do not have enough office space?

Here is the solution: subscribe to ActivPush and we award you a fax number in a couple of hours, then you receive all your faxes and voice messages in your email.

4 Steps

1. Register, and in a couple of hours you are awarded a unique fax number that you communicate to your clients. You can also keep your current fax number if you already have one.
2. A client sends a fax to this number.
3. You instantaneously receive an email with an attached file (TIFF format).
4. Open it : you discover the content of the fax. Then feel free to save it, print it, store it.

Plus

ActivPush also enables you to receive voice messages in your email : the sender calls your fax number with his telephone and records a message that you immediately receive in an attached file, in your email.
